## Cube™ Side Launch Davit

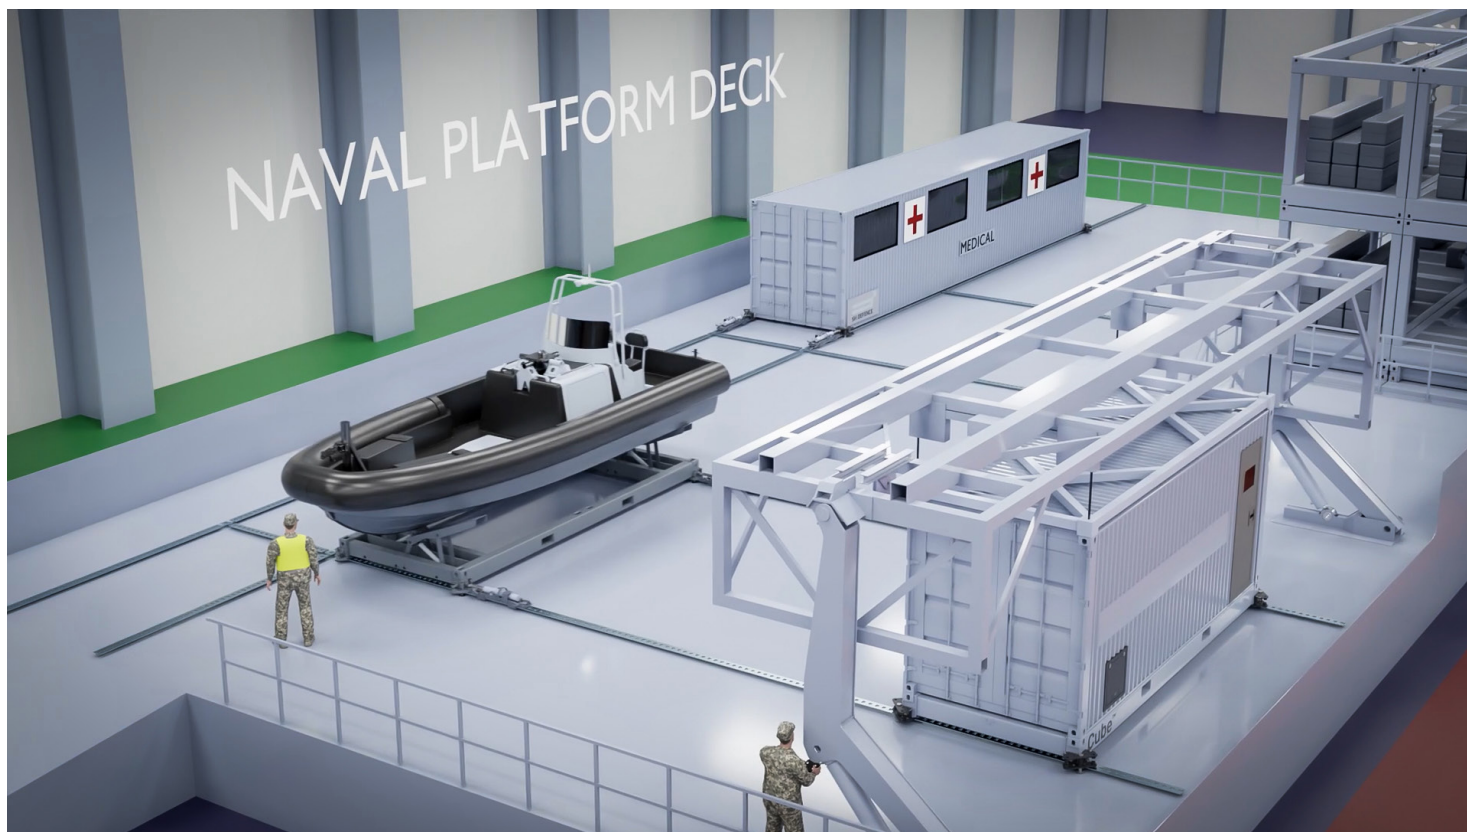

### Multi-purpose handling davit

The Side Launch Davit can pick up ISO 10', 20' and 40' containers or Cube™ modules, such as boats, from the quayside and insert them onto the Cube™ skidding system.

A large range of boats and USVs with single hoist or double hoist can be launched and recovered with the Multi-purpose Side Launch Davit making it a suitable choice when there is a need for flexible handling.

### Overall features

- Handling of 10', 20' and 40' ISO Container.
- Launch and recover of USVs and boats up to 12 meters in length.
- SWL of 16 tons.
- Integration with Sea State Skidding System.

The Side Launch Davit can pick up ISO 10', 20' and 40' containers or Cube™ modules, such as boats, from the quayside and insert them onto the Cube™ skidding system.

The illustrations show test facilities as they are intended in collaboration with Royal Navy.
