

Life support - Clean water · Power · Heating Stand-alone unit

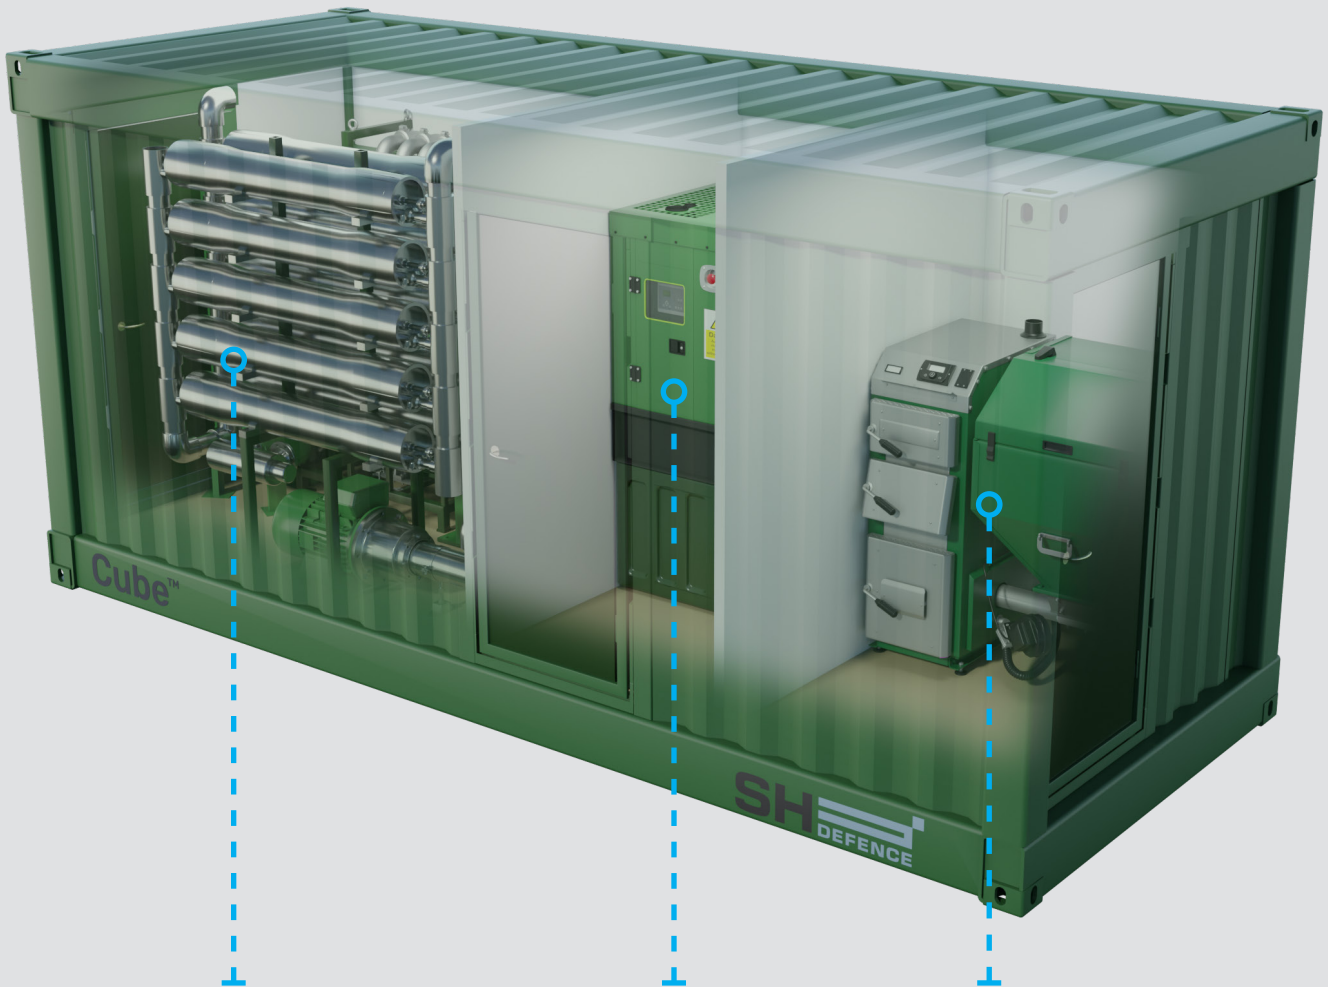

Cube™ Mobile Pioneer Module

This container is a stand-alone 3-1 unit. The first part contains a complete turnkey water treatment system and provides unlimited desalinated potable or technical water anywhere, anytime.

The second part is a Genset designed to run at full capacity in land-based harsh environments. The third part is a boiler system for heating of houses, supply to hospitals or other mobile container solutions like offices, field kitchens and hospitals.
